

Jeeva Pragathi .J (7th Std)

STUDENT SINCE 2013

G.R.D. PUBLIC SCHOOL, CBE

Student of

1) WHIZZKID - 2 - Two Year Classroom Program

At first I was not so interested in learning and then I joined to C.V.Raman. They taught me Science and Maths which was my favorite subjects. I learned more and more which is not in school. Maths here is in high level which in my school are in 10th standard. I love learning here in high level which increases my knowledge and I have scored good marks in Science and Maths at school. This is the place where I learned many things which is happening in the world and I want to be a doctor.

Mr. R. Jagathesan (Parent), Senior Manager (Project), CTS, CBE

After joining C.V.Raman Jeeva pragathi developed a habit of understanding everything she wanted to do and then does it. This attitude change helped her to learn than forced learning. It is a big positive change which helped her to gain more and more interest towards learning and it is driving towards building her confidence level for any competitive exams. Now she wants to read many books and trying to analyze any topic and also ready to debate in big crowd as well. This is a very positive change. Thanks to C.V.Raman for building confidence within my daughter. Ultimately that is what I feel is required for successful life and career.
